-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-3 were pending in the instant application at the time of the previous Office action, mailed February 22, 2007. By the latest amendment, filed August 22, 2007, new claims 4-16 are added. Therefore claims 1-16 are pending and have been examined.

Response to Arguments

2. Applicant's arguments, filed August 22, 2007, with respect to claims 1-3 have been fully considered and are persuasive. The rejections of those claims have been withdrawn.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 2 and 11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed towards a component, or a means for creating a container respectively. As per the Applicant's Specification, page 6 line 24 through page 7 line 1, the claimed means or component is a software application. The application is not taught as being embodied in a computer readable storage medium. Because of this, the claims are directed towards non-statutory subject matter.

From MPEP 2106.01 [R-5]: Computer-Related Nonstatutory Subject Matter:

Descriptive material can be characterized as either "functional descriptive material" or

Art Unit: 2137

"nonfunctional descriptive material." In this context, "functional descriptive material" consists of data structures and computer programs which impart functionality when employed as a computer component. (The definition of "data structure" is "a physical or logical relationship among data elements, designed to support specific data manipulation functions." The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) "Nonfunctional descriptive material" includes but is not limited to music, literary works, and a compilation or mere arrangement of data. Both types of "descriptive material" are nonstatutory when claimed as descriptive material per se, 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized.

Claims 2 and 11 are directed towards (functional) descriptive material *per se* since the container creation application is not taught as embodied in a computer-readable electronic medium. The application software cannot be considered as a computer component since it cannot effect a change of state of the processor.

Allowable Subject Matter

5. Claims 1, 3-10, and 12-16 are allowed.
